#### HIGHLIGHTS

Focus on our goal to continue to add value to EL 1165 Wowo Gap tenement in PNG, milestones achieved during the half year include:

- Successful renewal of EL 1165 Wowo Gap tenement achieved despite considerable delays within the approval process;
- Successful granting of two additional tenements, EL 1970 and 1980 adjacent to EL 1165, both containing similar ultra-mafic rocks which host the nickel laterite mineralisation at Wowo Gap;
- Identification and testing of potential hydro power source adjacent to the Wowo Gap nickel laterite deposit;
- Significant progress in the Social Awareness and Social Mapping campaigns for EL 1165 both essential for any future mine development; and
- Response to interest shown in potential development of a direct shipping of ore from the Wowo Gap orebody.
- The Directors present the financial report of the consolidated entity, consisting of Resource Mining Corporation Limited and its controlled entities ("RMC" or the "Consolidated Entity"), for the half-year ended 31 December 2012.

#### COMPANY REVIEW

#### REVIEW OF OPERATIONS

##### Wowo Gap Activities (RMC 100%)

The major focus of Resource Mining Corporation is on the development of its wholly owned Wowo Gap Nickel Project located 200 kilometres from the PNG capital of Port Moresby.

##### **Tenement Renewal**

EL 1165 was successfully renewed during the half year. This renewal confirms RMC's tenure to the company's most significant asset.

##### **New Tenements Granted**

As well as the renewal of EL 1165, two new exploration licences were granted: EL 1979 and EL 1980. Both new tenements are adjacent to EL 1165 and contain similar ultra-mafic rocks to the Wowo Gap Project that hosts the nickel laterite mineralisation. Preliminary exploration including mapping and sampling of the new tenements, will be conducted during the next 12 month period to assess the potential for further Ni laterite mineralisation.

##### **Social Mapping and Social Awareness Campaign**

RMC has been undertaking an important and significant Social Awareness and Social Mapping Program in the villages in immediate and near-by proximity to EL 1165. There are two main tribes associated with EL 1165, The Foyo tribe and the Boure tribe. In each tribe are clan and sub clan groups. The social mapping aims to identify, map, and sign-off on tribal boundaries as well as clan boundaries. Land ownership is traditional with no written records. For any future development, the Company needs to be aware of these boundaries when compensation payments are made. All agreed boundaries will be registered with the Provincial Land Authorities on completion of the task.

##### **Direct Shipping Ore Interest**

Based on the regulation changes in Indonesia where the Government has announced restrictions in the export of nickel ores from 2014 and uncertainty arising from court challenges to the regulations, there is general and considerable industry interest in seeking alternate sources of Nickel ore supply. RMC believes the Wowo Gap Project could supply this market and has focussed recent project activity towards understanding what is required to achieve this outcome and planning accordingly.

Matters of activity include:

- completion of comprehensive Social Mapping and Social Awareness projects to ultimately arrange and agree a Compensation Agreement with local landowners;
- completion of environmental study and plans;
- completion of mine study plans;
- investigation of port and road haul options; and
- engagement with all relevant stakeholders including the PNG Government departments including regular dialogue being maintained with the Minerals Resources Authority (MRA) for all matters pertaining to future development options.

#### **Wowo Gap Activities (RMC 100%) (continued)**

##### **Hydro Power Potential**

Following the identification of two waterfalls adjacent to the Wowo Gap ore-body, regular visits to two water-flow measuring sites have been initiated. Water flow, rainfall and other data essential for understanding the hydro power potential is being collected on a 2 weekly basis. The proximity of a significant potential hydro power source in close proximity to the ore-body could be important for any future mining development.

##### **Commercialisation Australia Grant: Organic Acid Leaching**

Test work undertaken by the CSIRO confirmed earlier work undertaken at other laboratories by RMC. Both Limonite and Saprolite ores were successfully leached using the organic acid

##### **Australian Projects**

RMC has received \$50,000 in funding from the Department of Mines and Petroleum under the Exploration Incentive Scheme (Round 6) Co-funded Drilling Program. The funding will cover 50% of the drilling costs targeting the buried greenstone rocks within the St Patricks Project.

The St Patrick's Project is located in the Yilgarn Craton Norseman-Wiluna greenstone belt approximately 50 kilometres north of Leonora. This greenstone belt hosts the nearby Thunderbox, Darlot and Wilsons Patch gold mines, together with the Teutonic Bore, Jaguar and Bentley base metals mines.

The project has been developed using the latest hydrochemistry and biochemistry techniques which have managed to 'see through' the 20 - 25m thick overlying blanket of granitoids though to the underlying greenstone sequences, confirming the presence of geochemical anomalism.

The hydro geochemistry has now identified anomalous geochemistry at a number of locations within the project area. Subsequent exploration activities have identified mafic and ultramafic lithologies from the historic wells and returned with anomalous geochemistry from surface sampling.

Drill testing is now required to confirm the presence and extent of the underlying greenstone belt, and possible Au, Ni or/and base metal mineralisation.

Other tenements are under regular review to determine exploration potential.

#### **MATTERS SUBSEQUENT TO 31 DECEMBER 2012**

Resource Mining Corporation ("RMC") completed the sale of its interest in the Argyle Iron Ore tenement to Kimberley Metals Group ("KMG") in 2009. Pursuant to the Sale Agreement, KMG agreed to pay RMC a contingent purchase price of \$1.35 million, if the first 2 million tonnes of iron ore from the Argyle Iron Ore tenement were sold and shipped at an average price above \$90 per dry tonne on a Free on Board ("FOB") basis.

The contingent purchase price payment of \$1.35 million was received from KMG on 22 February 2013.
